### C3 SCOPE OF WORK

---

#### C3.1 Employer's Objective

- To assist Lejweleputswa District Municipality (LDM) to set up rural RAMS, and collect road, bridges and traffic data on municipal road networks in line with the Road Infrastructure Strategic Framework for South Africa (RISFSA)
- Improved data on municipal roads to guide infrastructure maintenance and investments
- Reduced vehicle operating costs
- Prioritised project list for roads to inform MIG road maintenance projects

#### C3.2 Site Location

Lejweleputswa is one of the 5 districts of Free State province of South Africa. The seat of Lejweleputswa is Welkom. The majority of its 657 019 people speak Sotho. The district code is DC18. The district consist of five (5) local municipalities as shown in the figure below.

### C3.3 Project Scope and Objectives

The Employer requires the assistance of an experienced professional service provider to undertake the implementation / upgrade of its Road Asset Management System (RRAMS) and manage the system operational procedures and processes, in terms of DORA requirements, for a three (3) year period.

- Information and decision support system are indispensable for the effective management of the road network at both the operation and strategy level, in order to ensure good governance outcomes and optimal service delivery. In South Africa and throughout the world the road asset has suffered from decades of under-investment due to:-
  - Lack of investment in planned or periodic maintenance.
  - The lack of whole cycle management strategy.
  - Lack of effective and efficient routine and periodic maintenance.
  - Level of service has been budget driven rather than performance based

As a result many roads from strategic routes through to unclassified local roads are in a critical condition requiring capital investment to raise them to the desired level of service and thereafter to maintain them.

#### **Problem Statement**

Roads network development in South Africa is constitutionally a concurrent function across the three spheres of government, and thus to be effective relies on the coordination of processes and information sharing. Practically this has not been very successful, as evidenced by the commissioning of study to develop the Road Infrastructure Strategic Framework for South Africa (RISFSA). Chapter 4 of RISFSA has found that road asset management systems that are implemented by roads authorities are not of the same standard and the information that is drawn from them is not consistent. In addition, the various systems are not integrated internally or across the sphere of government. This makes it very difficult to adequately plan for interventions. Poor planning in turn leads to unsustainable expenditure of roads budgets which cannot be afforded in the current-economic context of South Africa.

The services required for the service provider shall comprise the following:

- Data collection on roads infrastructure in terms of lengths, types and condition;
- RAMS Software System maintenance and update
- Traffic data collection; Capacity building of LDM staff and engineering technicians employed, which must include accredited training and mentorship towards professional registration for the engineering technicians;
- Monthly progress reports on the development of the graduates and other programme KPIs;
- Monthly reports to the funding department in the required format;
- Arranging monthly meetings with stakeholders within the LEJWELEPUTSWA district;
- Compilation of annual reports and any other reports required by NDoT in terms of the DoRA framework; and
- Compliance to any other matters related to the DoRA framework in relation to the RRAMS allocation.
- Data analysis and road maintenance plans through the RRAMS system
- MIG priority list for local municipalities under LEJWELEPUTSWA District Municipality

## Extent of the Road Network

Table 1 below shows that the total paved road network for the district is approximately 1 247.16km.
